## PROFILE

Product & UI/UX Designer with a passion for creating clean, intuitive, and user-centered digital experiences. Skilled in wireframing, prototyping, and building clear user flows backed by logical problem-solving. I enjoy transforming ideas into functional designs and simplifying complex experiences into effortless interactions. Currently exploring product thinking, user psychology, and mobile-first design. I enjoy designing simple, structured, and visually clean interfaces that make users feel in control.

## EXPERIENCE & PROJECTS

### UI/UX Intern - Cognifyz Technologies (Tasks-Based)

- Designed personas, user flows, wireframes, and mobile UI screens
- Created moodboards and clarity-focused layouts
- Improved usability through structured design tasks.
- Executed responsive UI components and navigation layouts

### MediSpeak - UI/UX + Product Design Case Study

- Designed end-to-end user flows, personas, wireframes, and final UI
- Built functional UI using no - code tools
- Focused on accessibility, clarity, and mobile-first design
- Documented complete case study in portfolio

### Basic Calculator - Frontend + UI

- Built a clean and functional calculator UI using HTML, CSS, and JS
- Implemented proper spacing, layout hierarchy, and responsive structure
